1. Calendar year 2013 cat and dog intake and outcome data are self-reported by brick and mortar animal shelters.
2. Intake and outcome types are defined by Shelter Animals Count: <https://www.shelteranimalscount.org/glossary>
3. Live intakes include owner relinquishment, stray, transfer in, other live intake and owner requested euthanasia. It does not include animals dead on arrival or animals returning from foster care.
4. Live outcomes include adoption, return to owner, transfer out, return to field, and other live outcomes. It does not include animals entering foster care.
5. Live Outcome Rate was calculated as (live outcome)/(live intake) and **does not account for animals still in care**.
Example: 100 live outcomes / 150 live intakes = 67% Live Outcome Rate for animals that came in and / or left Jan - Dec. It does NOT mean the remaining 50 animals were non-live outcomes.
6. A total of 154 animal shelters were known to be operating in Florida in 2013. Of these, 154 submitted responses for the Florida Shelter Animal Census. Seventeen shelters were unable to provide data due to malfunctioning shelter software or operational closures. However, the number of shelters with available data represents an estimated 89% of all shelters, 98% of all sheltered animals in the state (based on prior animal populations for the shelters unable to provide data), and 63 of Florida's 67 counties.
